pod name	Status	Start time	UP time
geoservices-euro-5db44845c4-zbt4x	UP	2023-06-27 08:21:32	14 day

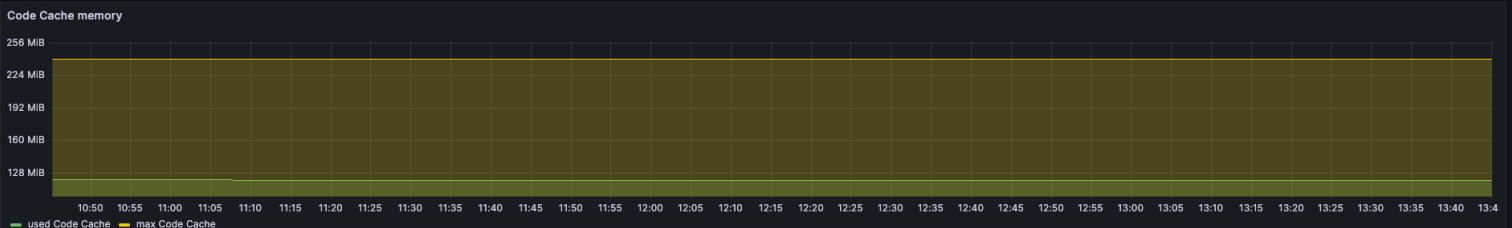

The figure consists of three charts. The first chart, 'Available physical memory', shows 62.8 GiB. The second chart, 'Used physical memory', shows 98.8% usage. The third chart, 'Used physical memory', is a line graph showing memory usage percentage from 10:50 to 13:40. The usage is consistently high, near 100%.

Time	Used physical memory (%)
10:50	~95
11:00	~95
11:10	~95
11:20	~95
11:30	~95
11:40	~95
11:50	~95
12:00	~95
12:10	~95
12:20	~95
12:30	~95
12:40	~95
12:50	~95
13:00	~95
13:10	~95
13:20	~95
13:30	~95
13:40	~95

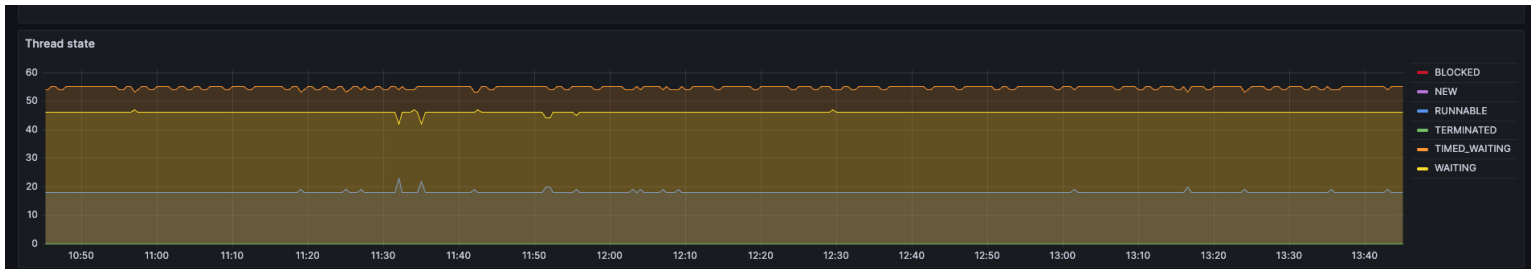

If you can see a maximum line constant and at -1, it means that the concerned resource is not limited

The following graphs are the magnified version of each pool on the memory pool graph
